## **PRESS RELEASE**

We are delighted to announce that Sonairte - The National Ecology Centre based in Laytown, Co. Meath is now operating as a drop-off point for TerraCycle - an eco-friendly recycling company that has become a global leader in recycling typically non-recyclable waste which would otherwise end up in a landfill.

We are currently recycling the following items with TerraCycle: crisp packets (any brand), Pringles tubs (Pringles only) and biscuit wrappers (any brand).

As our centre is currently closed in line with COVID-19 restrictions, please save up your waste over the lockdown, bring it in to Sonairte when we re-open and we will send it off to be recycled free of charge!

By doing this, not only will you be reducing plastic waste, you will also be helping to support our work to continue as every kilo of waste we recycle with TerraCycle will add up to donations to keep our ecology centre running. It's a win-win for the planet!

Please start saving up your waste now to make a big difference!
